

BASIC FLUSH KIT

The recirculating flushing system is a popular accessory for customers since it can be installed quickly to easily upgrade any of Satellite's standard, wheelchair accessible, and many other portable restrooms into a flushing unit. Satellite's recirculating filter system prevents waste from being pumped back through the bowl. Leaving it looking fresh and clean after each use.

Available with foot or hand pump.

PREMIUM FLUSH KIT

Satellite's Flip Top tank has a powerful nozzle flushing system. This unique system is operated by a low-maintenance hand pump installed on the waste tank deck or foot pump installed into the plastic roto-molded skid. Using fresh water from the Pro-22 sink to flush the waste, each user gets that at-home experience in a portable restroom.

Available with foot or hand pump.

PREMIUM FLAPPER FLUSH KIT

This unique flush system features a plastic flapper bowl that hides waste from view and seals tight to reduce odor. Retrofit any of Satellite's standard units and some specialty units into a flushing unit with the versatile flapper bowl. Flapper bowls can be installed as a fresh flush if the Pro-22 sink is included or recirculating flush system if no sink is present.

Available with foot or hand pump.

RECIRCULATING HAND FLUSH

The Western Recirculating flushing system is a quick and easy flushing upgrade to Satellite's wheelchair accessible restrooms, the Liberty and the Freedom. Satellite's Recirculating filter system prevents waste from being pumped back through the bowl. Leaving it looking fresh and clean after each use. The Western Hand Flush pump system fits both the 132-litre and 257-litre waste tanks.
