

FRESH FLUSH TANK

SMART WATER MANAGEMENT. CLEANER EXPERIENCE.

The Fresh Flush Tank delivers hygiene, efficiency, and adaptability in a compact design. Start with fresh water, then switch seamlessly to a recirculating flush using the integrated changeover valve.

With 40 L of fresh water and 146 L recirculated capacity, it supports up to 132 users before changeover. A large waste tank ensures reliable service for events or jobsites without interruption.

Fully compatible with the Slimmate handwash station, it can supply water directly and expand total fresh capacity to 78 L, providing greater flexibility for longer use.

KEY FEATURES AND BENEFITS

Dual-Flushing Capability

Use clean water for the first 132 flushes, then switch to recirculated water, no tools required, just a simple valve adjustment.

Impressive Capacity

146 liters of usable wastewater capacity, nearly matching standard flushing tanks, and well-suited for typical usage scenarios:

- A week of use at a construction site (approx. 60L waste)
- Busy weekend events (approx. 80–100L waste)

Modular Compatibility

- Fits with Mondo and Tufway units
- Compatible with the Slimmate handwash (fresh side connection via open deck)

Pump Options

Choose from foot or hand pump operation for flexible installation.
