GLOBAL

Satellite's Global restroom sets a new gold standard in portable sanitation with its sleek and sturdy design, perfect for any occasion. Key features include an impact base, three-roll toilet paper holder, large hands-free door latch, and a convenient hover handle. With thicker panels the Global is one of the strongest units available. The roomy interior and sleek side panels minimize dirt accumulation, simplifying the cleaning process. The Global restroom is not only effective but also cost-effective. Upgrade to unparalleled quality, reliability, and cleanliness with the Global.

Axxis

The Axxis restroom is a game-changer in portable sanitation, and its revamp was based on your feedback. It features durable stainless-steel hinges, a hands-free door latch, an oversized hover handle, and a re-engineered door assembly. The revolutionary impact base makes it ideal for both end-users and operators. Crafted for a spacious, movement-friendly environment, it has smooth surfaces and shallow impressions to reduce dirt buildup. This results in a cleaner restroom that elevates hygiene standards. Upgrade your portable sanitation experience with the Axxis, where innovation meets comfort and cleanliness.

TUFWAY

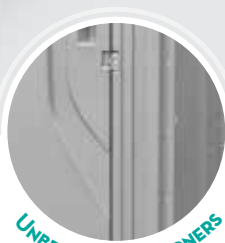

The Tufway restroom is the top choice for operators and end-users worldwide, thanks to its unmatched combination of durability and comfort. Designed with user comfort in mind, the Tufway boasts a spacious, well-ventilated interior that effectively reduces odors. This is achieved through molded-in vent screens that ensure continuous airflow. The urinal's innovative design drains down the vent pipe, preventing unwanted tank odors from escaping into the cabana. Additionally, the seat is strategically positioned at the furthest point from the urinal, keeping it out of sight and away from odors. For added convenience, a coat hook is provided for hanging purses or jackets. These thoughtful features come together to create a more comfortable and pleasant experience for every end-user.

MAXIM 3000™

The Maxim 3000™ features ultra-smooth walls and a spacious interior, keeping dust and debris at bay for a pristine appearance. Its rounded corners create an airy feel, and the contoured tank offers a comfortable sitting position. It utilizes twin-panel walls and a blow-molded front, making it nearly indestructible. The cabana's strength is enhanced by interlocking corners, a fitted base, and an overlapping roof design. Additionally, the Maxim 3000™ comes with a mirror, coat hook, and universal shelf for added convenience and functionality. This combination of durability and user-friendly features makes it a desirable and reliable choice.

HIGHRISE

The Highrise restroom is designed for the construction industry, fitting where other restrooms cannot with its compact dimensions of 33.5 inches wide and 87.8 inches high. This size allows easy movement through halls and doorways to the needed location. Its sealed casters prevent freeze-up and can be greased for reliability, with the front two casters lockable for stability. The galvanized metal frame and floor offer robust protection against damage during lifting and handling. This restroom provides essential privacy, maneuverability, and durability, making it indispensable for construction sites. Choose the Highrise for unmatched convenience and performance on the jobsite.

AGWASH

The AgWash™ upright handwash station mounts externally on portable restrooms, ensuring compliance with GAP open-air requirements. With a 17-gallon water capacity, it exceeds GAP's minimum-tank requirement. It includes a soap dispenser, a single-use towel dispenser, and operates via a recessed foot pump for about 330 washes. This makes it a convenient and efficient hygiene solution for agricultural sites.

FRESH WATER DELIVERY SYSTEM

Satellite's Fresh Water Delivery System is a must-have for on-site water delivery*. Perfectly designed for office trailer toilets or permanently installed sink fixtures, this system ensures a reliable and efficient water supply**. Available in both 102 and 275-gallon sizes, it caters to various needs, making it an essential addition to your setup.

**For non-potable water.*

***Auto-fill option is available.*

CONTAINMENT SYSTEM

In response to the growing regulations for waste and external storage tanks, Satellite has introduced a 250-gallon Holding Tank Containment System. This innovative system is designed to prevent contamination from failures or overflows. With direct port connections, service technicians can easily maintain the tank without needing to remove the lid, ensuring both convenience and safety.

**Non-Recessed 250 Gallon holding tank fits.*

Gray #24141

Natural #24140.

CONTAINMENT TRAY

Introducing Satellite's durable containment tray, designed to catch washdown with ease. Built for continual use, this tray features a reinforced base that maintains its shape and ensures longevity. It fits all standard-size restroom bases, making it a reliable and essential addition to your setup.

PIONEER CONTAINMENT TRAY

Satellite's Pioneer Containment Tray is designed to fit Pioneer trailers. Constructed with high-density plastic, it withstands the rigors of road travel and trailer flex. This tray effectively catches washdown and is compatible with all standard-size restroom bases.

300 GAL

The 300-gallon tank features eight recessed port locations with 3" Fernco-style couplings and three optional 10" manways. Its indented sides are designed to fit between and over the wheel wells of a standard pickup bed, maximizing space and ensuring a secure fit.

SPECIFICATIONS

NON-RECESSED
250 GAL

The Satellite non-recessed 250-gallon rotationally-molded polyethylene holding tank is a versatile solution for various applications. Its low-profile design, measuring 6' x 3' x 18", ensures it fits seamlessly into tight spaces. Each tank typically includes one 10" manway and four 3" cleanout ports, but custom configurations with as few as two ports are also available. Every port is equipped with a uni-seal grommet and threaded PVC connector, ensuring secure and reliable connections. Choose this tank for its adaptability and dependable performance.

SPECIFICATIONS

IMPACT BASE

RESTROOM LIFT KIT

Servicing multi-story construction sites has never been easier with the Satellite Industries portable restroom lift kit. Designed to fit all Satellite Standard restrooms with the Impact base, this lift kit allows for easy raising and lowering, even with a full tank of freshwater or wastewater.

The dual hook system stabilizes the restroom during lifting and lowering, preventing it from spinning. Combine it with Satellite's Port-O-Seal™ to ensure no waste or water spills during the process.

HIGHRISE

LIFT KIT

Uniquely fitted to the Highrise unit, a firm bond is made as the metal bars fasten directly to the unit and the top section has the added flexibility to pivot for added clearance.

HANDWASH

LIFT KITS

Seamlessly provide handwashing solutions to high-rise construction sites with the Handwash Lift Kit. Built with durable high-strength steel, the Handwash Lift Kit can be easily lifted and lowered, even with a full 22-gallon or 24-gallon freshwater or gray water tank. This ensures that workers' sanitary needs are met at every level of the construction site.

WCA & SPECIALTY FLUSH KITS

FREEDOM, LIBERTY & HIGHRISE

HAND FLUSH RECIRCULATING

The Western Recirculating flushing system offers a quick and easy upgrade for Satellite's wheelchair-accessible restrooms. This advanced system features a recirculating filter that prevents waste from being pumped back through the bowl, ensuring it remains fresh and clean after each use. Additionally, the Western Hand Flush pump system is compatible with both 35-gallon and 68-gallon waste tanks, providing flexibility and convenience.

HAND FLUSH FRESH FLUSH

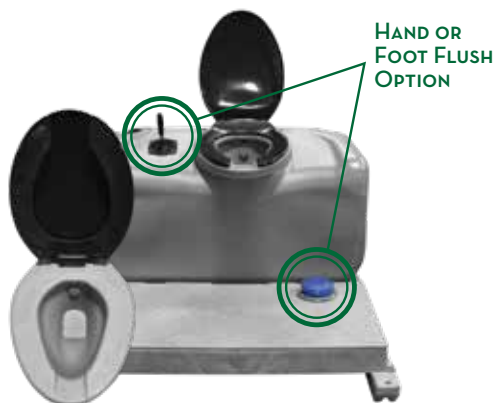

If you want to make your Liberty restroom more family-friendly, the Western Fresh Flush is the perfect upgrade. The Western Hand Flush pump system easily connects to the freshwater tank on the Pro-22 handwash sink, providing your customers with a full day of service for both handwashing and flushing.

HIGHRISE FLUSH KIT

The Highrise Recirculating Hand Flush is available in both Western and Flapper bowl options. Its innovative recirculating filter system ensures that waste is never pumped back through the bowl, keeping it pristine and fresh after each use.

STANDARD FLUSH KITS

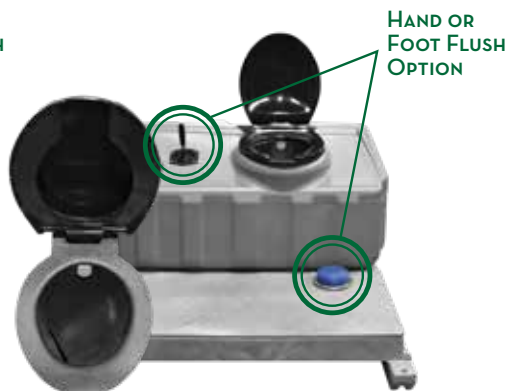

GLOBAL, AXXIS, TUFWAY, MAXIM 3000 & ASPEN

FLAPPER BOWL

This innovative flush system features a plastic flapper bowl that conceals waste and seals tightly to minimize odors. You can easily retrofit any of Satellite's standard units, as well as some specialty units, into a flushing unit with this versatile flapper bowl. It can be installed as a fresh flush when paired with the Pro-22 sink or as a recirculating flush system if no sink is present. The flapper bowl flush system is available with either a hand or foot pump option, offering flexibility to suit your needs.

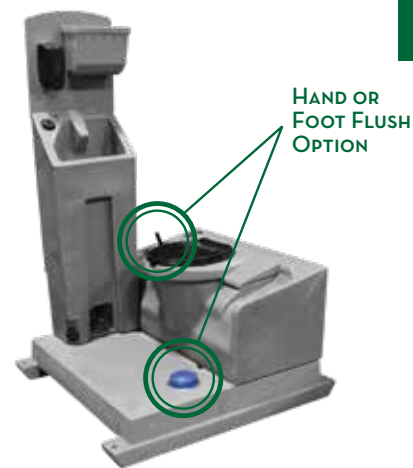

**Flapper bowl does not fit Axxis or Aspen portable restrooms. Foot Flush option is not available on Liberty or Freedom portable restrooms.*

WESTERN BOWL

The Western recirculating flushing system is a customer favorite due to its quick and easy installation, allowing you to upgrade any of Satellite's standard, wheelchair accessible, and many other portable restrooms into a flushing unit. Its recirculating filter system ensures that waste is never pumped back through the bowl, keeping it fresh and clean after each use. The Western Bowl Flush system is available with either a hand or foot pump option, providing flexibility to suit your needs.

**Foot Flush option is not available on Liberty or Freedom portable restrooms.*

FLIP TOP TANK

Satellite's Flip Top tank features a powerful nozzle flushing system, operated by a low-maintenance hand pump installed on the waste tank deck or a foot pump integrated into the plastic roto-molded skid. By using fresh water from the Pro-22 sink to flush waste, this system ensures that each user enjoys an at-home experience in a portable restroom.

**This tank only fits Satellite's Axxis and Vantage roto-molded base portable restrooms.*
