

FRESH WATER DELIVERY SYSTEM

Satellite's Fresh Water Delivery System is a must-have for on-site water delivery*. Perfectly designed for office trailer toilets or permanently installed sink fixtures, this system ensures a reliable and efficient water supply. Available in both 105 and 275-gallon sizes, it caters to various needs, making it an essential addition to your setup.

**For non-potable water.*

CONTAINMENT TRAY

Introducing Satellite's durable containment tray, designed to catch washdown with ease. Built for continual use, this tray features a reinforced base that maintains its shape and ensures longevity. It fits all standard-size restroom bases, making it a reliable and essential addition to your setup.

CONTAINMENT SYSTEM

In response to the growing regulations for waste and external storage tanks, Satellite has introduced a 250-gallon Holding Tank Containment System. This innovative system is designed to prevent contamination from failures or overflows. With direct port connections, service technicians can easily maintain the tank without needing to remove the lid, ensuring both convenience and safety.

**Non-Recessed 250 Gallon holding tank fits.*
