

SHOWER CABIN

HOT SHOWER

By design, the shower cabin is simple to connect to the available water source and the gas heater provides an almost immediate flow of warm water for users. Those setting up the shower and those using it will both be pleasantly surprised at how well the cabin shower meets the need for comfort and convenience.

COLD SHOWER

The mobile, economic cold water shower cabin impresses both rental companies and users and is already being used on beaches, lakesides and camping sites across Europe. The shower head can be adjusted manually, from a powerful massage jet to a soft normal spray.
